

When **safety** is at stake, it's worth taking special care.

BPW spare parts represent an investment in the safety of your vehicles and their cargo. It therefore makes good sense to insist on genuine BPW brake drums and linings.

The market now offers replica parts that are difficult to distinguish from the BPW original by appearance. In many cases, however, they do not satisfy BPW's exacting requirements. Thanks to careful friction pairing of the brake drums and pads, BPW brakes offer the best possible braking and wear behaviour.

Trials have confirmed that the use of inferior-quality non-genuine products can significantly impair braking behaviour. In practice, this is reflected in a longer stopping distance when the brakes are applied in an emergency, and uneven wearing of the brake components over time. The consequences are diminished safety, much shorter service lives, and higher costs arising from premature wear.

For this reason, always insist on the genuine product. Ask your BPW authorised dealer about genuine spare parts for BPW drum brakes.

Genuine BPW drum brakes

Insist on the quality benefits of genuine BPW spare parts.

- › Material quality absolutely identical to that of the OE parts
- › Insensitive to soiling, suitable for all types of operation
- › Extremely resilient, even in the harshest operating conditions
- › Quick and easy brake servicing thanks to proven ECO principle

- › Product liability and straightforward processing of warranty claims
- › Long service life and reliability ensured by perfectly matched individual components (compatible and an exact fit)
- › Redesigned inspection window in dust covers for simple checking of drum and lining wear
- › Perfect friction pairing of brake drums and linings for reduced wear and low life-cycle costs

Other BPW products with which our **spare parts are perfectly aligned:**

BPW DISC BRAKES

Proven dependability.

- › Special BPW brake disc alloy ensures good durability
- › Heat dissipation optimised by enlarged disc surface area
- › Perfect pairing of brake discs and pads

BPW ANTI-FRICTION BEARING GREASE

Expertise ensures long service life.

- › Excellent lubricating effect for reduced bearing wear
- › Very good adhesion even at elevated temperatures
- › Highly effective protection against wear prolongs service life of the entire bearing

Only the **original** is **genuinely the best.**

Genuine BPW quality should always be the first choice.

With more than eleven million units sold, BPW drum brakes epitomise dependability. High-quality materials in combination with excellent manufacturing processes ensure supreme reliability. Thanks to their proven technology and rugged design, BPW drum brakes are extremely resilient, even in the harshest operating conditions.

Extensive trials and road tests have spawned a perfect friction pairing, which is instrumental in reducing both wear and life-cycle costs.

The inspection window in the dust covers facilitates the checking of drum and lining wear, and the proven ECO principle ensures straightforward and quick brake servicing. The brake drums and linings of the new patented ECO Drum generation can also be retrofitted to existing drum brake axles (backward compatibility).

BPW AIR BAGS

Quality capable of withstanding any pressure.

- › Perfect fit and simple installation
- › Designed for maximum loading according to BPW specifications
- › Long service life for maximum economy
